

## **IF INSULIN BECOMES TOO LOW...**

**Blood sugar rises, cells do not get sugar, diabetic coma results: Ketosis advances to acidosis, nausea, vomiting, dizziness, deep breathing and coma. Slow onset, skin dry and flushed, dry mouth, thirsty, BP low, pulse weak.**

**Treatment: Give insulin**

## **IF INSULIN BECOMES TOO HIGH...**

**Blood sugar falls, cells remove sugar from bloodstream, insulin shock results: Sudden onset, skin becomes moist, pale, and sweaty. Shaking, tremors, anxiousness, Irritable, shallow breathing, drooling, headache, BP normal, pulse full and pounding.**

**Treatment: Give sugar**

**BLOOD SUGAR RANGES:**

<b>Before breakfast:</b>	<b>70-105</b>
<b>Before lunch or dinner:</b>	<b>70-110</b>
<b>1 hour after meals:</b>	<b>less than 160</b>
<b>2 hours after meals:</b>	<b>less than 120</b>
<b>Between 2 and 4 AM:</b>	<b>greater than 70</b>

INSULIN  
SHOCK

# HYPOGLYCEMIA

(Low Blood Glucose)

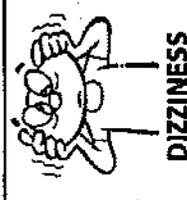

**Causes:** Too little food, too much insulin, or diabetes medicine, or extra activity.

**Onset:** Sudden, may progress to insulin shock.

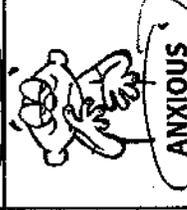

## SYMPTOMS

SWEATING

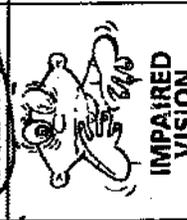

DIZZINESS

ANXIOUS

HUNGER

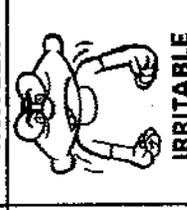

IMPAIRED VISION

WEAKNESS  
FATIGUE

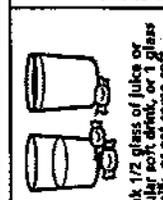

HEADACHE

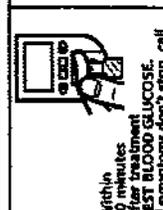

IRRITABLE

WHAT  
CAN  
YOU  
DO?

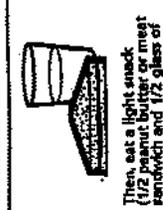

GIVE  
SUGAR

Drink 1/2 glass of juice or regular soft drink, or 1 glass of milk, or eat some soft candies (not chocolate).

Within 30 minutes after treatment TEST BLOOD GLUCOSE. If symptoms don't stop, call your doctor.

Then, eat a light snack (1/2 peanut butter or fruit sandwich and 1/2 glass of milk).

SHALLOW BREATHING, DROOLING, PULSE

DIABETIC  
COMA

# HYPERGLYCEMIA

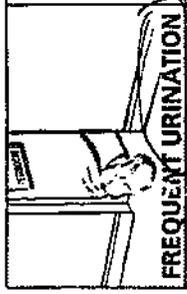

(High Blood Glucose)

**Causes:** Too much food, too little insulin or diabetes medicine, illness or stress.

**Onset:** Gradual, may progress to diabetic coma.

ALCOHOL BEATH, NAUSEA, VOMITING

## SYMPTOMS

FREQUENT URINATION

DRY SKIN

FLUSHED

EXTREME THIRST

BLURRED VISION

DROWSINESS

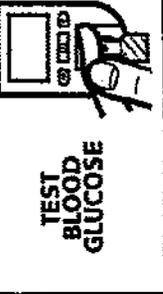

HUNGER

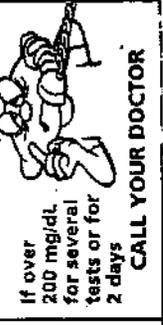

DECREASED HEALING

WHAT  
CAN  
YOU  
DO?

GIVE  
INSULIN

TEST  
BLOOD  
GLUCOSE

If over 200 mg/dL for several tests or for 2 days CALL YOUR DOCTOR

DEEP BREATHING
